## SUMMARY

Senior Product Designer (UX/UI) with 8+ years designing SaaS, web and mobile products, brands and content for B2B and B2C companies in the United States, Mexico, Ireland and Latin America. I lead end-to-end product design, from user research, information architecture and user flows to design systems, high-fidelity UI and interactive prototypes, taking products from first concept to launch and measuring their impact with analytics and A/B testing. I work with an AI-assisted workflow (Claude, Cursor, Figma, Midjourney) to explore ideas and build functional web-app prototypes faster, backed by a strong visual foundation in art direction and brand identity. Experienced leading design teams and partnering with developers on technical feasibility and handoff.
